

# Soft Band

Patient Identification

**A better patient ID solution**

The **SoftBand** features the ability to print wristbands and labels on **ONE SHEET** utilising your existing laser printers.

## Efficient. Safe. Clinically Effective.

Compared to other solutions, the laser printer friendly **SoftBand** speeds the hospital admission process, whilst providing a smooth, comfortable identification solution for all users – from premature babies to elderly patients. With our patented phthalate and latex free material, our bands provide smear & smudge-free usage ensuring information is always easily read.

## Customised to your Requirements.

The **SoftBand** is available in different sizes and styles for every patient you treat. From newborns to bariatric patients, we have the solution for the most complex organisation. Available as a combination sheet consisting of wristbands and label stickers.

## Compliant with all Safety & Quality Specifications Worldwide.

The **SoftBand** patient identification wristbands and hospital labels can assist in patient identification to ensure every patient, drug, sample or blood unit is safely and properly identified through the hospital experience. It allows instant identification of the patient direct from your Patient Information System.

**TEAR-PROOF & TAMPER-EVIDENT**

**SMUDGE & SMEAR RESISTANT**

**LATEX & PHTHALATE FREE**

## Uses Existing Laser Printers.

From wristbands to admission forms – all can now be printed on the one laser printer at the same time. **SoftBand** has been tested, certified and approved on a wide range of leading brand laser printers.
